CLASS- IV
SUBJECT- English
CHAPTER- The Sentence
TOPIC- Types of Sentences

Worksheet 1

Instructions:

- Tear pages from old notebooks and do the worksheet in those pages.
- Worksheet to be completed by the 10th of April, 2020.
- Answer key of the worksheet will be provided with the next set of worksheets.
- Send your feedback to Ms. Masarrat Khan at masarrat111.mk@gmail.com. Mob. No. 9829162063.
- Visit the link to learn more about the types of sentences and to access more practice questions- <https://www.englishclub.com/grammar/sentence/type.htm>

There are four kinds of sentences in the English language.

1. Imperative- gives a command and ends with a full stop(.
2. Declarative- makes a statement and ends with a full stop(.
3. Interrogative- asks a question and ends with a question mark(?).
4. Exclamatory- expresses strong feelings and ends with an exclamation mark(!).

Read each sentence carefully and add the correct punctuation mark. Then, label it as imperative, declarative, interrogative or exclamatory.

Example: You did an excellent job

You did an excellent job! - Exclamatory sentence

1. How was your day in school ____ - _____
2. Do your assignments in class on time ____ - _____
3. I'm so excited I passed the test ____ - _____

4. Walking up that mountain is dangerous ____- _____
5. Did you do your homework ____- _____
6. He is the leader of the group ____- _____
7. What is your favourite show ____- _____
8. Congratulations on your achievement ____- _____

9. I love to play badminton ____- _____
10. What a difficult exercise that was ____- _____

Change these sentences to the form that is mentioned in the brackets.

Example: Were the mangoes sweet? (Exclamatory Sentence)

How sweet the mangoes were!

1. Is the baby crying? (Declarative Sentence)
2. Sneha will go to school tomorrow. (Interrogative Sentence)
3. I will come to the meeting at 2 o'clock. (Imperative Sentence)
4. The children are naughty. (Exclamatory Sentence)
5. How beautiful are the flowers! (Declarative Sentence)
6. The milk is hot. (Interrogative Sentence)
7. Will you sit straight? (Imperative Sentence)
8. He won the match. (Exclamatory Sentence)

TOPIC – Number Name, Expanded Form and Standard form

Write in Standard Form and in Words

$$30,000 + 7,000 + 800 + 3$$

Thirty-seven thousand, eight hundred three

	TTh	Th	H	T	O
Number	3	7	8	0	3

Number Name : Thirty seven thousand eight hundred three

Expanded form:

In words: 3 ten thousands + 7 thousands + 8 hundreds + 3 ones

In figure: 30,000 + 7,000 + 800 + 3

Standard Form:

Example:

Ninety seven thousand nine hundred ninety nine

97,999

WORKSHEET – 1

Q.1 Write the numbers in **word form** on the blank. The first problem is completed for you.

(a) 42,237 =Forty two thousand two hundred thirty seven

(b) 76,390 = _____

(c) 5,897 = _____

(d) 16,541 = _____

(e) 2,002 = _____

(f) 99,403 = _____

Q.2 Write the numbers in **expanded form** on the blank.

(a)72,435 = 70,000+ 2,000 + 400 +30 +5

(b) 28,201 = _____

(c) 6,610 = _____

(d) 84,429 = _____

(e) 19,532 = _____

(f) 5,082 = _____

Q.3 Write the numbers in **standard form** on the blank.

(a) Twenty two thousand one hundred fifty six = 22,156

(b) Seventy five thousand eight = _____

(c) Ninety six thousand two hundred = _____

(d) Nine thousand eight hundred twenty one = _____

(e) Thirty eight thousand twenty two = _____

(f) seven thousand two hundred seven = _____

Plants and Food

There is a vast variety among living forms found on earth. All living beings are classified as belonging to one of the two kingdoms: the plant Kingdom or the animal kingdom.

Most plants have a green substance in their leaves, known as chlorophyll, which gives them their colour. Chlorophyll absorbs sunlight and helps plants prepare food from carbon dioxide and water. This process is known as photosynthesis.

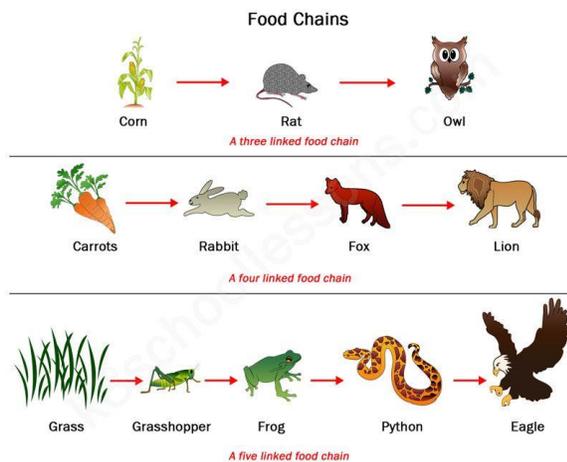

Animals depend on plants for their food, as they cannot manufacture their own food.

A food chain is defined as a series of living beings each dependent on the next as a source of food. A food chain always starts with the producer, the living being that produces food. This is usually a green plant. All the other beings in a food chain are called consumers, that is, an animal that eats a plant or another animal.

Humans depend largely on plants for their food requirements. Many people eat meat as well, which is a good source of proteins.

In the simple food chain, the grass is the producer and the sheep and the man are the consumers.

Example: Grass ----->Sheep-----> Man
(producer) (consumer) (consumer)

QA). Fill in the blanks:

1. All living beings are classified into two kingdoms the _____ kingdom and the _____ kingdom.

2. Leaves are green because of the presence of a pigment called _____.

3. _____ absorbs sunlight and helps plant prepare food.
4. Plants prepare food through a process known as _____.
5. All _____ depends on plants for their food.
6. A food chain always starts with the _____ or green plants.
7. Animals that eat plants or other animals are called _____.
8. A living thing that makes its own food from sunlight is called a _____.

QB). Which food chains are in correct order :

- a) Grass ----->sheep----->wolf
- b) Rabbit-----> grass-----> Fox
- c) Big Fish-----> little fish-----> Seaweed
- d) Grains ----->rat----->snake-----> hawk

QC). Draw a food chain

GLOBES

Planet earth is round in shape like a ball. To study the earth, we need a proper map. The most accurate model of the earth is a globe, which is a spherical structure. The globe gives us a true representation of different places located on the earth.

A globe shows the earth's five oceans and seven continents. A globe also shows how the earth rotates on an imaginary centre line called an **axis**. At the ends of this line are the North and South Poles. These poles help us find **directions** on the earth.

An imaginary line shown on a globe is called the **equator**. This is a horizontal line that runs around the centre of the earth and divides it into two halves called hemispheres. It is exactly halfway between the North Pole and the South Pole. The northern half is called the northern hemisphere and the southern half is called the southern hemisphere.

Another imaginary line divides the earth into the eastern and western hemispheres. This line is called the **prime meridian**. This line runs from the North Pole to the South Pole.

1. Draw and then label the following

LABELING A GLOBE

The illustration shows a globe on a stand with two empty rectangular boxes for labeling. Below the globe are two crayons: a blue one labeled 'water' and a green one labeled 'land'. To the right of the globe is a vertical word bank with three dashed boxes containing the words 'water', 'globe', and 'land'.

2. Name the seven continents.

3. Name the five oceans.

4. Name the four directions.

5. Fill in the blanks :

- a. A _____ is a small model of the earth, spherical in shape.
- b. The earth's _____ is slightly tilted.
- c. The _____ is an imaginary horizontal line that goes around the middle of the earth.
- d. A vertical imaginary line called the _____ divides the earth into the eastern and the western hemispheres.
- e. _____ is a continent in the eastern hemisphere.
